

## **Editor-in-Chief's Message**

We welcome all our readers to the first issue of seventh volume, of OKRP, KJSE (Office of KEC Research and Publication, KEC Journal of Science and Engineering). In this issue, we are proud to present our readers articles from our international and national contributors who have generously shared their research findings on various aspects of science and engineering research.

The field of science and engineering is a highly dynamic one. It requires rigorous research and development of new tools, techniques, and methods for the growth of industry and society. The gap between industry requirements and that of academic curriculum is fulfilled by research of academicians.

In spite of our best efforts, due to the decision of the editorial board and the referee review board, some of the articles/papers could not be included in the present issue. However, this should not deter any of the authors from sending their original articles, case studies, research reviews or empirical contributions for publication in our journal in near future.

To all our authors: thank you for making this issue possible, and to our reviewers: thank you for supporting us in enabling OKRP, KJSE to achieve the high quality that it strives for. We hope everyone, from authors to reviewers, will continue to give their strong support to this journal in future too.

**Dr. Pratima Pradhan**

Editor-in-Chief

OKRP, KJSE
