Editorial

The Research Journal is an open access peer-reviewed and multidisciplinary journal published by the Research Unit of Mahendra Ratna Multiple Campus (MRMC), Ilam, the first QAA certified constituent campus of Nepal. The aim of our journal is to bring teachers of this campus to a platform where they can actively engage in writing and research works for their personal and professional growth and also quench the thirst of the readers and research enthusiasts. The articles here vary in their nature and contents ranging from Education, Management Humanities and Social Sciences (Geography, History, English, Economics, Population, Health, Nepali etc.) These contributions obviously include some of the current local and global issues, new knowledge, expertise and experience. Mostly, this journal includes research articles written by the teachers of this campus and outside the campus on their subjects and fields so that we could share both technical ideas and theoretical as well as empirical outputs. We have started to publish annual research journal offline since 2072 to promote research activities in academia and encourage the teachers and students for academic writing and publication. We believe that academic knowledge should be shared among scholars periodically to strengthen academia through teaching, learning and researching.

We would like to extend our thanks and gratitude to the contributors and the peer-reviewers of the manuscripts for their sincere comments and suggestions and also to the campus administration, MRMC, Ilam for coordination and cooperation for the continued growth of the journal in both online and print. Acknowledgements are also due to language editors and editorial team. We also thankful to Dr. Amrit Kumar Shrestha, Associate Professor at the Central Department of Education, Kirtipur for his technical support and advices.

Constructive comments and feedback are always welcomed and appreciated!

Happy Readings!!
